ABOUT ME

People with whom I worked with find me cooperative for my ability to understand easily the way each member of the team thinks and works. I find it easy to adapt in new environments and I have a lot of fun in the challenges that come along. I am a hardworking person with lots of curiosities about the programming field.

HOBBIES

- Off-road cycling, through surrounding parks and forests
- Camping and chalet going, hiking and exploring nature
- Computer malware research, learning about the different methods used in protecting and removing such threats

PROJECTS

HACKATHON – TEENS IN AI

- This was a hackathon in which we were tasked with carrying out a project that used Artificial Intelligence. We had to face different obstacles, from picking out a relevant field and a problem of interest, to building a fitting visual interface and determining all the functional specifics. One of the biggest aids which led to the project completion were the Design Thinking courses we took at the beginning of the project, courses in which we learned how to use "Miro".
- Overall this project shown me the numerous difficulties in project management and has helped me acquire fundamental knowledge in project planning.

PRIMETECH RO025 - ROBOTICS CLUB IN HIGH SCHOOL

- My role was that of a software programmer, mainly tasked with programming the robot's automated and manual control.

EDUCATION

BACHELORS - COMPUTER SCIENCE

"BABES-BOLYAI" UNIVERSITY

2021 - 2024

HIGHSCHOOL - COMPUTER SCIENCE

"TIBERIU POPOVICIU" HIGH SCHOOL

2017 - 2021

LANGUAGES

- Romanian - Native
- English - C1 (CAE)
- German - B2 (Goethe-Zertifikat)

SKILLS

- Python - Intermediate
- C++ - Intermediate
- C# - Moderate
- Git - Intermediate
- Java - Moderate
